

Risk has always had an implicit role in ISO standards, but the newer version gives risk a more prominent role in quality and environmental management standards. ISO 9001:2015 requires companies to apply risk-based thinking to a variety of processes across planning, operations, and performance evaluation.

Learn all about it today!

Earn four (4) training hours by completing this course!

This technical course is recommended for those who have completed the Orientation on ISO 9001: 2015 Quality Management System from June 2022 onwards.

Please take note of the following course requirements before you register.

Completion of the Modules
