## Activities to Implement the Policy on an Environmentally Friendly Value Chain Consistent with Sustainable Development

SSS KLIMAP Investing Policy (*Kalikasan, Lipunan at Mabuting Pangangasiwa*): Policy on Environment-Social-Governance (ESG) Investing (also known as Sustainable Investing)

Under Resolution No. 598 dated 20 August 2019, the Social Security Commission (SSC) approved the SSS KLIMAP Investing Policy (*Kalikasan, Lipunan at Mabuting Pangangasiwa*): Policy on Environment-Social-Governance (ESG) Investing (also known as Sustainable Investing).

Recognizing the growing global importance of environmental and social issues, and aligning with the government's "Green, Green, Green" and "Build, Build, Build" initiatives, the Social Security System (SSS) adopts an ESG investing policy. This policy acknowledges that ESG factors have material short- and long-term impacts on the performance of SSS investments.

SSS believes that investing should generate both financial and social value. Through ESG investing, the institution aims to achieve competitive market returns while contributing to solutions that address environmental and social challenges. The objective is to balance financial sustainability with responsible investing, ultimately benefiting members, their beneficiaries, and society as a whole.

Creation of an Environmental, Social, and Governance Committee

Under Resolution No. 18 dated 16 January 2025, the SSC approved the Committees for 2025, including the Benefits and ESG Committee, which is tasked with reviewing and overseeing the benefit programs of the SSS and its ESG framework.
